SPE BM Division Education Committee Chairperson
Ineos Olefins & Polymers, Tech Centre
La Porte, Texas

Mark,

The students and I would like to extend our sincere thanks to you and the committee for all of the positive activities we were involved in as a result of the conference. From the student's point of view, they would like to thank all of those folks who contributed to their scholarship awards, the covering of their expenses, the knowledge they gained at the presentations, and the ability to distribute information through having a table in the display area. They also had a very positive response and input into the potential job fair with employers being proposed for future ABC events. It was a great honor for them to be able to meet giants of the Blow Molding Industry as well and see the importance of this area within the Plastics Industry as a whole. On a personal note, I am very appreciative of all the above, but must also include a huge thanks to the entire SPE Blow Molding Division for the acceptance and recognition being offered to Ferris, our Plastics Program, and our students. I know we will be introducing a better educated professional in the future as a result! Would you please extend these thoughts to the rest of the committee and help express our ongoing gratitude!

Again, with sincere thanks - Jason Merkle, Russell Ankenbrandt, Larry Schult and the rest of the FSU Plastics Program.
